

# LogMeIn & SnagIt Workshop

## CAT & NACAT

Instructor: Thomas G. Broxholm (AKA PowerPoint Man)  
School: Skyline College / San Bruno, CA  
Auto Subjects: Electrical & Drive Trains  
Computer Subjects: Digital Video  
Business Owner: TGB Computing  
Business Goals: Educational Training modules, video & animation.  
Computer consulting, diagnosis, repairs & upgrades.  
School Phone: 650-738-4131  
School Website: <http://smccd.edu/accounts/broxholm>  
Personal Website: <http://www.tgbcomputing.com>  
Web CAT Training: From my site click on “Educational Modules”  
NACAT Downloads: Click the link on the Educational Modules page  
User name:  
Password:  
Email: [tb1@tgbcomputing.com](mailto:tb1@tgbcomputing.com) Subject: NACAT

**What is LogMeIn?** <http://www.logmein.com>

LogMeIn is a secure remote desktop service that offers a free version and a paid pro version. In very simple terms if you have a LogMeIn account, and LogMeIn installed on one of your computers, you will be able to access that computer from any other computer that has internet access. Your LogMeIn computer must be on and connected to the internet for this to work.

### **What are some of the things you can do with LogMeIn Pro?**

- You can work as if you are sitting in front of the remote computer.
- You can print the document you're working on remotely to the printer at your remote location.
- You can change the resolution of the monitor your work and on. You can change the color depth, and you can hear the sound from the remote computer.
- You can transfer files between computers.
- You can share files that are located on your computer. Then send a link to a colleague or friend, they are then able to do a secure download right from your computer.
- With the mini meeting feature. You can invite guests to view what you're doing on your computer. They can see and watch everything that you're doing. Therefore, you could even give a presentation through the Internet from their computer to your computer.
- There is a file manager feature which allows you to create folders, move files, copy files and synchronize folders.

## What can you do with LogMeIn free?

- LogMeIn free allows remote desktop access. This is the only service you get with LogMeIn free. However there are ways around transferring files. You can always e-mail them to yourself or, if you have an FTP site you can FTP them to yourself.

## Signing up for LogMeIn.

1. Navigate your web browser to [www.LogMeIn.com](http://www.LogMeIn.com).
2. Sign up for a trial version of LogMeIn pro.
3. Install the LogMeIn software onto your computer.

## What is SnagIt.

SnagIt software by TechSmith is a premier screen capturing software. The software can not only capture still images and videos from your screen, but it can also retain hyperlinks and capture scrolling web pages. It also includes a whole slew of tools for editing your photos and images. There are so many features. It is impossible for me to list them all.

### A few things I want to show you about SnagIt.

1. How to convert a batch of images and apply particular attributes to all the images.
2. How to add hotspots to an image and assign text pop-ups, image pop-ups or hyperlinks to a webpage.
3. How to capture a scrolling webpage and save it as a PDF while retaining the hyperlinks.
4. How to edit your image by adding arrows, lines, boxes, circles and text.
5. How to record screen motion as a video file, such as capturing a flash animation from a web browser.
6. How to capture and save wiring diagrams from Mitchell 1, and AllData.
7. How a capture a still image and send it directly to Microsoft Word, PowerPoint or as an image within an e-mail.
8. How to insert a Flash SWF file into PowerPoint.

SnagIt by: TechSmith Corporation
